

Intelligent 9 Golden Series:

USB Drive/USB-HDD Duplicator

U-Reach Intelligent 9 series USB drive duplicator contains smart, reliable and beneficial functions. Its effortless use means a PC or other software are not required; and no risk of virus infection. Golden series can duplicate from 9 and up to 119 targets, and has added some more important functions – Event Log report , Durability test and double source comparison.

Features

Operation Type

Stand-alone, FPGA-based operation
(Non PC-based system design).

Bandwidth Performance

Speed transfers of up to 2.0GB/min.
(33MB/sec.) Dedicated bandwidth
enables high-volume replications
without speed degradation.

Modular Socket Design

Modular-designed ports effectively
reduce downtime and is cost-effective
for long-term ownership.

Event Log Management

- Records: operating durations, individual port copy progressions, connected device models, capacities, serial numbers, and PASS or FAIL results.
- Device writing/reading speeds are recorded.
- Log report files are generated through Port #1 or through the U-Reach PC Link Software Utility.

Controller Design

Embedded controller is designed to support
capacities over 18TB+. Constant improvement
supports latest market –available devices.

Read-Only Source Port

There is no option to disable this built-in
feature and it is integrated with all U-Reach
duplicators.

Real-Time PC Monitoring

View live status for: writing/reading speed,
total capacity, current function progress per
port.

Write Protection

Perform hardware-level write protection to only selected devices that supports it.

Burn-in Test

Customize testing duration to determine the quality of the connected device(s).

Double Source Comparison

Instead of wearing out a source device, two source devices are utilized to reduce wear during mass productions.

Get “Device” ID

Retrieve all connected device information by its: port number, capacity sector, VID, PID, serial number, and vendor.
