

MT-U Series: SATA Hard Disk /SSD Duplicator and Eraser

MT-U series is a professional SATA HDD duplicator, specially designed for high volume duplication. U-Reach adopted a unique multitasking technology that can simultaneously copy up to 23 targets with a high transfer speed of 30 GB per minute. We guarantee the highest productivity without speed degradation, even as the number of targets increase.

Features

Operation Type

Stand-alone, FPGA-based operation
(Non PC-based system design).

Bandwidth Performance

Speed transfers of up to 30.0GB/min.
(500MB/sec.) Dedicated bandwidth
enables high-volume replications
without speed degradation.

Modular Cabling Design

Modular-designed ports effectively
reduce downtime and is cost-effective
for long-term ownership.

Event Log Management

- Records: operating durations, individual port copy progressions, connected device models, capacities, serial numbers, and PASS or FAIL results.
- Device writing/reading speeds are recorded.
- Log report files are generated through Port #1 or through the U-Reach PC Link Software Utility.

Controller Design

Embedded controller is designed to support
capacities over 18TB+. Constant improvement
supports latest market-available devices.

Read-Only Source Port

There is no option to disable this built-in
feature and it is integrated with all U-Reach
duplicators.

Real-Time PC Monitoring

View live status for: writing/reading speed,
total capacity, current function progress per
port.
